2 OCT 1964

MEMORANDUM FOR THE RECORD

SUBJECT: Note from FPBC Meeting on 28 September 1964

1. The conclusions of the briefing by [redacted] at 25X1A
the FPBC meeting on Monday, 28 September, were as follows:

a. Any increases in the funds for OSI or FMSAC
for external analysis will have to be heavily justified
before the Bureau of the Budget. We will be required to
demonstrate the substantive intelligence that will be
produced.

b. The Bureau of the Budget will take a hard look
at the Agency assuming any increase role in ELINT
collection/analysis. We will probably have to justify any
increase on other than a QRC, "high qualifications," or
"nice to have" basis.

c. There is no provision in the 1966 budget for
funds for communication satellite (O/Commo).

d. Life sciences were boosted in both FY-1965 and
-1966. To justify FY-1966, we will need some "hard
relating of the specific research to intelligence applications
and Agency missions."

2. Mr. Kirkpatrick summarized by stating that:

a. We were in for some "heavy weather" in R&D
budgeting and that the BOB will look particularly hard at
the amount of coordination we effect with other Government
agencies and industry.

b. We "squeaked through" the last hearing without
direct criticism and should prepare ourselves for heavy
scrutiny during the October-November BOB review.

c. There is an allergy to external research by the Bureau of the Budget. We should address ourselves to the question of decreased personnel vs increased contract assistance and the need for exclusive talents which we are unable to hire or it is unwise to hire on a permanent basis.

3. Mr. Kirpatrick urged all AD's to prepare in depth for the forthcoming Bureau of the Budget hearings.
